

1. Cut along this line to make a square →

2. Fold paper diagonally to make a triangle ↘

3. Fold to make a smaller triangle ↘

4. Fold here →

5. Cut along the lines to make the snowflake ↘

A large square template for a snowflake. The square is defined by a dashed border. A solid diagonal line runs from the top-left corner to the bottom-right corner. A solid vertical line runs from the top edge to the bottom edge, positioned one-third of the way from the left. A solid horizontal line runs from the left edge to the right edge, positioned halfway down. A solid vertical line runs from the top edge to the bottom edge, positioned halfway across. The snowflake shape is drawn with solid lines, starting from the center and extending to the corners and midpoints of the sides. The shape is symmetrical across all four axes. The instructions are placed around the square: '1. Cut along this line to make a square →' at the top left; '2. Fold paper diagonally to make a triangle ↘' at the top right; '3. Fold to make a smaller triangle ↘' on the left side; '4. Fold here →' at the top center; and '5. Cut along the lines to make the snowflake ↘' in the upper right quadrant.
